Hints (/problems/first-unique-character-in-a-string/hints/)

Submission (/problems/first-unique-character-in-a-string/submissions/)

🔀 Pick One (/problems/random-one-question/)

Given a string, find the first non-repeating character in it and return it's index. If it doesn't exist, return -1.

Examples:

```
s = "leetcode"
return 0.

s = "loveleetcode",
return 2.
```

Note: You may assume the string contain only lowercase letters.
