🔀

Pick One (/problems/random-one-question/)

Find the kth largest element in an unsorted array. Note that it is the kth largest element in the sorted order, not the kth distinct element.

Example 1:

Input: [3,2,1,5,6,4] and k = 2

Output: 5

Example 2:

Input: [3,2,3,1,2,4,5,5,6] and k = 4

Output: 4

Note:

You may assume k is always valid, $1 \leq k \leq \text{array's length}$.
