[Description \(/problems/group-anagrams/description/\)](/problems/group-anagrams/description/)[Hints \(/problems/group-anagrams/hints/\)](/problems/group-anagrams/hints/)[Submissions \(/problems/group-anagrams/s](/problems/group-anagrams/s)[Pick One \(/problems/random-one-question/\)](/problems/random-one-question/)

Given an array of strings, group anagrams together.

Example:

Input: ["eat", "tea", "tan", "ate", "nat", "bat"],
Output:
[
 ["ate","eat","tea"],
 ["nat","tan"],
 ["bat"]
]

Note:

- All inputs will be in lowercase.
- The order of your output does not matter.
